📍 Guadalajara, Mexico

PROFESSIONAL SUMMARY

Full stack software engineer with 6 years designing, building, and leading end-to-end technology solutions, from initial requirements and solution design through development and deployment to production. Takes the technical lead on each project, defining the approach and architecture, coordinating the engineers building it, and owning delivery through to adoption. Shipped data infrastructure, analytics platforms, and web applications that support 1,000+ employees daily in enterprise and manufacturing environments. Bridges business and engineering, translating complex operational needs into technology, working directly with senior executives and area leaders to create products that improve processes and drive decision-making at every level of the organization.

WORK EXPERIENCE

Senior Analytics Specialist, PiSA Farmacéutica. Guadalajara, México.

September 2023 — Present

Lead the design, development, and delivery of software applications and data platforms for manufacturing and quality operations across 14 production plants. Primary technical owner of each solution: define the approach and architecture, coordinate the engineers building it, and own delivery through to adoption, working directly with central directors of Manufacturing and Quality, plant directors, and area managers.

- Architected and delivered the **Manufacturing Data Warehouse** on BigQuery in 8 months, centralizing and automating production and quality data from all 14 plants under unified business rules. Eliminated manual data consolidation and established the foundation layer now powering company-wide analytics and automation, from executive dashboards to shop-floor tools used daily by 1,000+ employees.
- Designed and automated **"Red Neuronal"**, a Power BI based measurement platform that gave leadership first-ever visibility into production release performance. Adopted as the official monthly metric used by the central directors to evaluate all 14 plants (300 users: directors, managers, engineers).
- Built **"Metrix"**, a suite of Power BI KPI dashboards (Laboratory, Compliance, Manufacturing, Quality) covering input, process, and output metrics, standardizing performance measurement and replacing manual reporting for 300 area analysts.
- Developed **"DMX"**, a progressive web app (PWA) for project and activity tracking used by 1,000+ employees to monitor day-to-day work and improve area-level execution and compliance.

Senior Web Developer, Genpact. Guadalajara, México.

June 2022 — August 2023

Led full stack projects end-to-end for enterprise clients in banking, technology, and supply chain: scoped needs with stakeholders, authored solution proposals, designed architecture, and drove development through deployment.

- Built **"GSF" (Global Solution Finder)**, an internal platform cataloging every solution delivered across the organization so teams could find work already proven at one client and apply it to another. Used by 2,000+ employees to accelerate delivery through reuse instead of rebuilding from scratch.

Web Developer, Genpact. Guadalajara, México.

June 2021 — June 2022

Developed full stack web applications on MERN/PERN stacks (React, Node.js, Express, PostgreSQL, MongoDB) for multiple enterprise clients across industries, working with senior developers and stakeholders to ship high-quality, scalable solutions. Promoted to Senior in 12 months based on delivery quality and growing ownership of client-facing work.

Freelance Web Developer. Guadalajara, México.

June 2020 — June 2021

Designed and built landing pages, web APIs, microservices, inventory database systems, and workflow automations for business clients, owning the full cycle from requirements to delivery.

EDUCATION

- Bachelor of Science in Computer Graphics and Systems Engineering. Universidad Panamericana, Guadalajara.
- August 2017 — June 2020

LANGUAGES

- Spanish: Native
- English: Professional working proficiency (B2, Duolingo English Test).

CERTIFICATIONS

- Analysis & Problem-Solving — 4PAR 2024
- Agile Intermediate — Genpact 2023
- Lean Six Sigma Green Belt — Genpact 2022
- Lean & Data Lean — Genpact 2021

SKILLS

Product Management

- Product Discovery
- Requirements
- Prioritization
- Design Thinking
- Product Design
- Prototyping
- Figma
- Lean Six Sigma

Software Engineering

- React
- Next.js
- TypeScript & JavaScript
- Node.js & Express.js
- Python
- Rest API
- PostgreSQL & MongoDB
- Git & Github

Data Engineering

- SQL & NoSQL
- Data Modeling
- Data Pipelines
- Data Warehousing
- BigQuery
- Dataform
- Datastream
- Power BI

Technical Leadership

- Product Leadership
- Product Delivery
- Technical Decision-Making
- Stakeholder Management
- Solution Ownership
- Agile Scrum
- Jira
- Confluence

Cloud & Architecture

- Google Cloud Platform
- Solution Architecture
- System Design
- Event-Driven System
- Microservices
- API Architecture
- Enterprise Integrations

AI & Automation

- LLM Integration
- MCP
- Agent Workflows
- Prompt Engineering
- AI-Assisted Development
- Workflow Automation
- Power Automate
